## **The Early Years Foundation Stage (EYFS)**

This is a very important stage as it helps your child get ready for school as well as preparing them for their future learning and successes. From when your child is born up until the age of 5, their early years' experience should be happy, active, exciting, fun and secure; and support their development, care and learning needs.

The EYFS explains how and what your child will be learning to support their healthy development. Your child will be learning skills, acquiring new knowledge and demonstrating their understanding through 7 areas of learning and development. Children should mostly develop the 3 prime areas first. These prime areas are those most essential for your child's healthy development and future learning.

These are:

- Communication and language
- Physical development and
- Personal, social and emotional development

As children grow, the prime areas will help them to develop skills in 4 specific areas. These are:

- Literacy
- Mathematics
- Understanding the world and
- Expressive arts and design

These 7 areas are used to plan your child's learning and activities. The professionals teaching and supporting your child will make sure that the activities are suited to your child's unique needs and interests.

**Please give some examples of what your child enjoys learning:**

**Is there anything else you would like to tell us?**

**Does your child attend another early year's setting?**
